

Array list

Array list is a part of collection framework and is present in java.util package. It provides us with dynamic array in java.

String Class:-

The string class represent character string. All string literals in java programs, such as 'Abc', are implemented as instance of a class. String are constant, their value can not be changed after they are created. String objects are immutable they can be shared.

Collection:-

The collection in java is a framework that provides an architecture to store and manipulate the group of object. Java collections means a single unit of object.

Immutable in java

Immutable class in java means that once an object is created, we can not change its content. In java all wrapper classes like Integer, Boolean, Byte, Short and String class are Immutable.

Mutable:-

The objects in which you can change the fields and states after the object is created are known as Mutable object. Ex - Java.util.Date.

Constructor Overloading

Constructor overloading is a concept of having more than one constructor with different parameter list, in such a way so that each constructor performed a different task.

write a query to get Max 5 high value

```
SELECT * FROM table1 WHERE id = (SELECT  
MAX(num1 + num2) FROM table1  
table2 Limit 5)
```

What do you know about Java?

Java have various features like it is robot language. It is a strongly type language, means we can not use upper case in case of lower case. in place of lower case. And many more features like Encapsulation, Abstraction, ~~Polymorphism~~ Inheritance and polymorphism and all that.

Loop L

In computer programming, a loop is a sequence of instructions that is continually repeated ~~at~~ until a certain condition is reached.

Strengths:-

I am adaptive in any environment, and I am a person of positive attitude, hardworking and dedicated.

Salary Expectations:-

As I am a fresher my first salary does not matter. My first priority to get a job and start my career in such industry where we can gain knowledge and experience. So, I expect good ~~salary~~ salary as per my skill and company norms.

* As I am a fresher, I want to ~~improve~~ improve my skill and knowledge. I believe that you will offer me salary as per your company norms and my job profile.

Where do you see yourself in 5 years?

⇒ I look forward to learn new skill ~~and~~ improve my knowledge to advance career. In five years from now, I see myself as knowledgeable professional having an in-depth knowledge of the company and the industry.

Why should we hire you? ~~best answer~~

⇒ Being a fresher, I think I am very flexible and adaptive to learning new things. I am sure I will be able to contribute something capable for the growth of the company. My last project in operation has taught me how to be a team player, and work in unison.

What are your weaknesses?

- 2)
- Leaving project unfinished.
 - Providing too much details in reports.
 - Switching from one project to another.
 - Taking credit for group project.
 - Taking on too many project at once.
 - Taking on too much responsibility.

* Why do you want to work at our company?

Because I know this company will help me to enhance my skill and gain more knowledge in the industry. I am fresh graduate and I am looking forward for an experience. If you are going to give a chance^{ce} to work with you I will do my best.
